

Dr. Peterson
Georgia Tech Facilities, Inc. Appreciation Lunch
Wednesday, June 26, 2013

Just returned from summer tour, talked about a time of momentum. Much of that momentum involves facilities for our campus.

Wouldn't be possible without Georgia Tech Facilities Inc. that enables Tech to take advantage of alternative funding source to address needs. It provides us the flexibility needed to take advantage of opportunities that otherwise wouldn't be possible, including everything from research and teaching facilities, to housing, student services, and daycare.

(Can give some of these as examples:)

- Carbon Neutral Energy Solutions building (opportunities for partnerships with industry and business, national prominence)
- North Avenue Dining
- Children's Campus (a need for years, now met)
- North Avenue Apartments (acquired in 2007 and renovated. Now home for 2,000 students)
- Electrical Substation, Klaus Parking Facility
- Family Apartments
- Molecular Science and Engineering Building, the 4th in the biotechnology quad. (Now expanding with EBB)
- Campus Recreation Center (still one of the best in the nation)
- Student Health Center
- Tech Square (keeps expanding)
- Bioengineering and Bioscience Building

25-year Strategic Plan: Designing a campus to meet both existing and anticipated needs for the future requires vision. We benefit from the vision of those who have

gone before us. Thank you for your expertise, your commitment to Georgia Tech and its future, and the work you do to make a difference now and in the future.
